SUMMARY

Full Stack Engineer with 5+ years of experience designing, developing, and deploying scalable web applications. Specialized in JavaScript and TypeScript ecosystems with strong expertise in React, Node.js, Express, MongoDB, and cloud infrastructure. Experienced in designing distributed systems, REST APIs, microservices, caching strategies, and CI/CD pipelines.

CORE COMPETENCIES

MERN Stack • TypeScript • React • Next.js • Node.js • Express.js • MongoDB • PostgreSQL • Redis • Docker • AWS • REST APIs • GraphQL • Microservices • System Design • CI/CD

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Innovate Labs Pvt. Ltd. | Mumbai, India | March 2023 – Present

- Architected and developed multiple customer-facing applications using React, TypeScript, Node.js, and MongoDB.
- Designed backend services processing over 1 million API requests per month.
- Led migration of a monolithic Node.js application toward modular service-based architecture.
- Implemented Redis caching, reducing frequently accessed API response times by 40%.
- Designed CI/CD pipelines using GitHub Actions and Docker.
- Mentored a team of 4 junior developers and conducted technical code reviews.
- Collaborated with product managers to convert business requirements into technical solutions.

Full Stack Developer

DigitalSphere Technologies | Mumbai, India | August 2021 – February 2023

- Developed SaaS applications using React, Redux, Node.js, Express, and MongoDB.
- Built reusable UI component libraries, reducing development time across multiple projects.
- Integrated payment processing, email services, analytics, and cloud storage providers.
- Designed secure authentication systems using JWT, OAuth, and role-based access control.
- Optimized MongoDB aggregation pipelines and database indexes for large datasets.

Junior Web Developer

WebStack Solutions | Pune, India | July 2020 – July 2021

- Built responsive web interfaces using React, JavaScript, HTML, and CSS.
- Developed REST APIs using Node.js and Express.
- Worked with MongoDB for data storage and query optimization.
- Fixed bugs and improved application performance across multiple client projects.

SELECTED PROJECTS

SaaS Analytics Platform

Stack: Next.js, TypeScript, Node.js, MongoDB, Redis, AWS

- Designed multi-tenant database architecture.
- Built real-time dashboards and analytics APIs.
- Implemented Redis caching and background job processing.
- Integrated AWS S3 for file storage.
- Developed role-based access control and organization-level permissions.

Real-Time Collaboration Platform

Stack: React, Node.js, Socket.io, MongoDB, Docker

- Built real-time messaging and collaboration features using WebSockets.
- Implemented presence indicators and live notifications.
- Designed scalable backend architecture for concurrent users.

- Containerized services using Docker.
-

EDUCATION

Bachelor of Engineering — Computer Engineering

University of Mumbai | 2016 – 2020

ADDITIONAL INFORMATION

Languages: English, Hindi, Gujarati

Open Source: Contributed bug fixes and documentation improvements to JavaScript and React ecosystem projects.

Interests: System design, distributed systems, developer tools, and artificial intelligence.
